

BC Marine Trails Site Condition Report Contest

Our annual site condition report (SCR) contest begins on the first of May! Every SCR submitted until the end of September is an entry into a draw to win one of three prizes, generously provided by Mustang Survival — see below: Taku Waterproof jacket, Vibe foam vest, Torrens thermal crew

The BCMT site map is a community effort — a significant portion of our site condition data comes from reports submitted by you! Reports include location, maintenance needs, landing conditions, new hazards, site photos, etc. Reporting only takes ~10 minutes of your time. If you find value in the BCMT map, we encourage you to report on your next site visit!

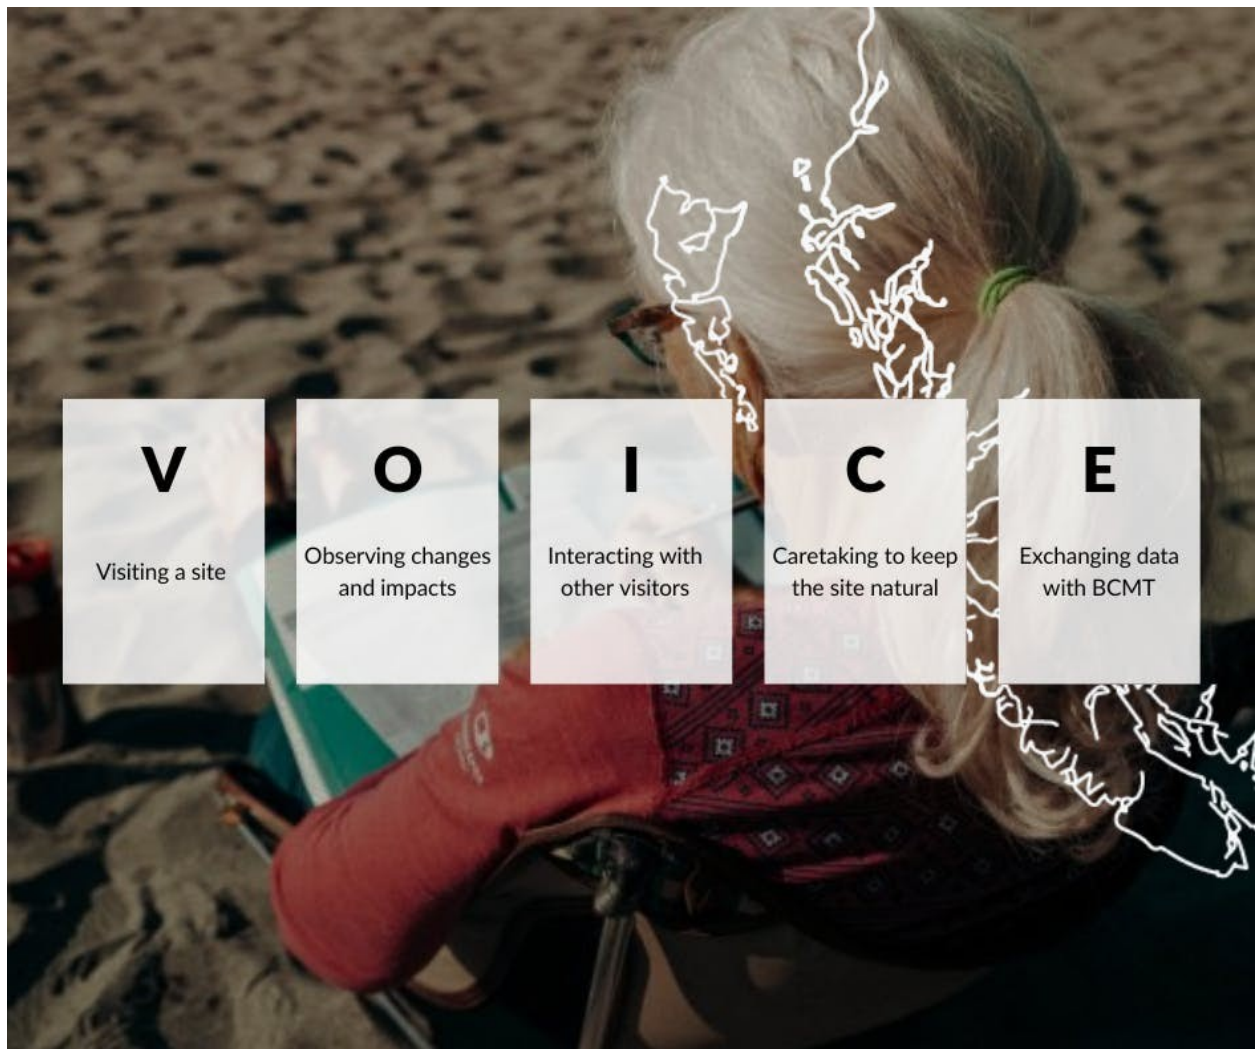

How can you submit a site condition report?

1) Collect relevant notes and photos in the field, and submit a report via our website upon your return.

OR

2) Download the ArcGIS Survey123 app on your mobile device. Load the BCMT site condition report survey from our website, then, submit reports directly from the field!

Looking to take your reporting one step further? Coastal Caretakers are dedicated to safeguarding the coastline — giving VOICE to the sites they visit.
